### Transmed SFA

- Transmed is being developed with Mobile Sales Force Automation (MSFA) solution.
- This application includes both pre-sales and van sales modules.
- It is a world-class Mobile Salesforce Automation Solution that is now used by some of the largest FMCG (Fast-moving consumer goods) Distribution companies. It has been built with the goal to allow companies to sell more.
- It has various modules like Sales Order, Store Check, Order Summary, Payment, Payment Summary, Planogram Execution, VanLoad, etc.

### iKonnnect

- iKonnnect is a mobile app for iKonnnect solution, where employees can request the following services like Salary Transfer Letter, Bank Account update, leave request, Transport Request, Visit Visa request, etc. These service requests are visible only in the portal to authorize persons like Admin and HR. Once the request is approved/rejected from the higher authority then the notification will occur for identification purposes.

### Jazeera Airways

- Jazeera Airways application used for booking airline tickets.
- Book domestic and international flights using this app and pay using multiple payment.
- Select your preferred seat and get your boarding pass delivered to your email.
- Passengers can change their seats or cancel their tickets.
